Introduction

- Rockbuster Stealth is planning to launch an online video rental service. We need to make a company strategy.
- This is being done to stay competitive with other streaming services. We need to make sure we are launching it in a way that is successful.

Key Objectives

- What was the average rental duration for all videos?
 - Which movies contributed the most/least to revenue gain?
 - Which countries are Rockbuster customers based in?
 - Where are customers with a high lifetime value based?
 - Do sales figures vary between geographic regions?
-

Recommendations

Price of Rentals

- Consider raising the price of movies, especially the ones that are most popular. If movies make less than a set minimum amount, drop them.
- More research is needed into whether a subscription fee or a price per movie would be more successful.

Movie Focus

- Popular Genres and Movie Titles should be highlighted on the streaming service.
- More research is needed into what makes a movie popular and more likely to be streamed.

Country Focus

- Trial the streaming service in the countries that have the most customers and sales first.
- Since there is a strong relationship between number of customers and sales, there needs to be a priority on expanding customer base across the globe.
